

FELITRON

Mais que headset.

PRODUCT CATALOGUE

Felitron 38 Years

You have certainly heard of me. I have audio in my DNA. With it I create, develop and bring to life my products; but much more is required – one has to reinvent himself every day. In the last 3 decades I have been working to transform my customers into my fans, and that has made me a reference...

Epko X BT

Bluetooth Headset

Epko X BT is a headset with Bluetooth 5.0 technology of last generation, developed for professional use in calls and videos, but without abandoning the superbass and the audio HD so that you can listen to your favorite music and games.

X Line

Superior Audio Quality

Through an exclusive system composed by 2 high-precision MEMS microphones, the cancellation of noise guarantees a greater quality of voice for those who listen to you. The Headset with balanced 58 mm speakers and super-soft leather ear cushions reduce the surrounding noise, contributing for better concentration and comfort in prolonged use.

Easy Connection with More Autonomy

With the new technology Bluetooth 5.0, the connection with other devices is much easier, safe and with more battery autonomy. Participate in calls and conferences connected to your PC and listen to your list of favorite reproduction in your mobile telephone. All this without worrying with the battery, more than 18 hours of reproduction of music and 12 hours of conversation. The stand by time is 240 hours.

X Line

Characteristics

- Voice Warnings
- First quality Xline Design
- 58 mm Auriculars
- Ultra-soft leather ear cushions
- Last generation Bluetooth 5.0 with APTX
- Call Controls: volume, mute, redial
- HD Balanced Speakers for calls and music

Answer your calls up to 20 meters of distance

With the chipset Bluetooth Qualcomm 5.0 the most powerful ever developed, you can answer your calls up to 20 meters of distance from your mobile telephone, reproduce music or participate in conferences by means of a softphone in your PC.

- 2 MEMS Microphones with Noise Cancellation
- Intelligent key for connection with Voice Assistant
- Acoustic isolation for a greater passive cancellation of noise
- Neoprene case to carry and store your Headset
- Compatible with the main platforms of Unified Communications
- Multimedia controls: music reproduction, pause, repetition, and more.

X Line

Epko X USB

Headset USB

The Epko X USB is a first quality stereo Headset designed for professional use in calls and videos, but without abandoning Superbass and audio HD to listen to your favorite music.

Epko X USB Stereo

Headset USB

Characteristics

- Premium XLine Finish
- Optimized for Microsoft Teams
- Audio stereo HD for voice and music
- Available in USB-A and USB-C versions
- Ultra-soft artificial leather ear cushions
- Volume, mute, and call handling Controls
- Super-flexible cable reinforced with Kevlar®
- Cotton pouch to store and carry your headset
- High sensitivity microphone with noise cancellation
- 58 mm auriculars and Superbass and audio HD controllers with passive noise cancellation
- Sound conditioning system and electronic protection against noise and acoustic shocks

Epko X USB Mono

Headset USB

Characteristics

- XLine premium finish
- HD audio for voice and music
- Ultra-soft leatherette ear cups
- Optimized for Microsoft Teams
- Available in USB-A and USB-C versions
- Volume, mute and call-answer control
- High-sensitivity noise-canceling microphones
- Highly durable Kevlar®-reinforced flexible cable
- XLine pouch to take your headsets with you wherever you go
- 58 mm headphones and superbass audio drivers with passive noise cancellation

Professional

For call center professionals who require a durable product with superior audio quality.

Comfort

Durability

Performance

Epko Series

The line of Epko Headsets, favorite among the largest call centers in Brazil, has become a reference in the professional headset market. It combines unmatched durability, exceptional comfort, innovative design, and an incredible sound fidelity, developed especially for continuous use in call centers, and for professionals that need a high performance headset. Available in noise cancelling, replaceable and fixed voice tube versions.

Epko Series

Premium Materials and Finish

- The light-engineering, last-generation polymers and the mechanized stainless-steel pieces guarantee long durability, performance, and sophistication.
- The cable bushing composed of engineering elastomers and the cable reinforced with Kevlar filaments, provide a perfect combination of flexibility and resistance.
- The advanced ergonomic stainless-steel headband, the lateral rubber support, and the auricular protection provide maximum comfort and stability in prolonged use.

Quality of High Definition Audio

- Sophisticated electronic system of noise cancellation, protection against acoustic shocks, and audio equalization that guarantees clear and secure calls according to Anatel, IEEE (Institute of Electrical and Electronic Engineers) and CE (European Community) Standards.
- Designed to comply to the new tendencies of unified communications. In the version with Quick Disconnect (QD), the same Epko Headset can connect directly to telephone terminals or to Felitron's USB audio processors for the connection to PC, Notebook or Softphones.
