MAIN CHARACTERISTICS

Premium Materials and Finish

- State-of-the-art engineered polymers and stainless steel parts guarantee high durability, performance, and sophistication.
- Redesigned bushing and cable reinforced with Kevlar® fiber provides a perfect combination of flexibility and strength.

Comfortable and Ergonomic

- Advanced ergonomic system with stainless steel headband covered with hypoallergenic material, rubberized side support, and foam ear cushion provide maximum comfort and stability for prolonged use.

HD High-Definition Audio Quality

- Sophisticated electronic noise cancellation system, protection against acoustic shocks, and audio equalization guarantee crystal clear calls and total safety for the user in accordance with Anatel, IEEE (Institute of Electrical and Electronics Engineers) and EC (European Community) standards.
- Designed for the newest trends in Unified Communications. In the Quick Disconnect (QD) version, the same Epko headset can be connected directly to telephones through an RJ9 cable, and to PC's or notebooks using a Felitron USB Interface.
- Available with noise cancelling microphone, replaceable voice tube or fixed voice tube.

VERSIONS

- Connect the headset directly to digital and VoIP terminals.
